

First author: Associate Prof. Sevgi Ozkan

Title of abstract: Nursing Education in Turkey, Past And Present

Topic that best corresponds to the abstract: Creating Professional Identities for Nursing

Summary:

Purpose: The aim of this lecture is to demonstrate the status of nursing education in Past and Present in Turkey. In a general sense both the lecturers and students will have a chance to tell nursing education in Turkey as the pre-republic period and post-republic period and to tell the last form of nursing education programme in Turkey and to tell objectives of the graduate programme nursing.

Result: Although early on the educational requirements for nursing included only three years of nursing preparation in a high school, today all new professional nurses must complete a four-year educational program which follows graduation from high school. After many difficult struggles, nursing education in Turkey today compares favorably to international educational standards for nursing.

Conclusion: The result will be very useful for both the nursing students and lecturers because this will make it possible to share our knowledge and our experiences and also be able to increase our professional experiences.
